LUBRICATION LEADER

HYDRAULIC HAMMERS

MEYERLUB® has over 45 years experience in the lubrication of demolition hammers. A full range of greases has been developed and field tested, in the most severe conditions, in co-operation with the most important equipment Manufacturers worldwide. Our R&D Laboratories have achieved exceptional results.

LORAX®

ORIGINAL

Top Performing Hammer Grease

IMMERSION

HIGH TEMPERATURE

LOW TEMPERATURE

OUTSTANDING PERFORMANCE

IN THE MOST SEVERE CONDITIONS

- Exceptional adhesiveness
- Increased protection against wear and seizure
- Resistance to high temperatures
- Pumpability at low temperatures
- Optimal lubrication in all critical points
- High water repellency
- Clean lubrication channels

Now also in Biodegradable version.

LORAX-BIO® is now completing our prestigious range, to meet all needs, from medium and heavy hammers in continuous service and in difficult conditions, to smaller units occasionally used. In any case the most suitable grease for an optimal cost/performance ratio.

A COMPLETE PRODUCT LINE FOR HYDRAULIC HAMMERS

MEYERLUB LUBRICANTS

DRUMS

(180, 50, 25, 5 kg)

STANDARD CARTRIDGES

(600, 450 ml)

SCREW-ON CARTRIDGES

The most complete range
on the market.

**RAMMER
ADAPTER**

LUBRICATION SYSTEMS

POWER GUN

SPEEDY SYSTEM

POWER GREASE

POWER LUBER

TRANSFER PUMP

**CARTRIDGES
GREASING UNIT**

HOW LORAX® PROTECTS YOUR INVESTMENT

Many greases for hydraulic hammers are often conventional greases, with the simple addition of solid lubricants. Hydraulic hammers are machines that operate at high frequency and under heavy loads.

This is why it is absolutely necessary to use the appropriate lubricant.

UNSUITABLE GREASE

POOR LUBRICATION

RESULT: failures, downtime,
frequent maintenance, higher costs.

LORAX® GREASE

OPTIMAL LUBRICATION

RESULT: reliable operation,
long machine life, saving in overall costs.

THE LORAX[®] BENEFITS

Up to € 9.000 savings per year for medium-heavy hammers.

TOOLS

Up to 1/3 consumption

BUSHINGS

Up to 1/5 consumption

GREASE

consumption reduction
up to 70%

MAINTENANCE

1/3 of the frequency

PRODUCTIVITY

Less downtime

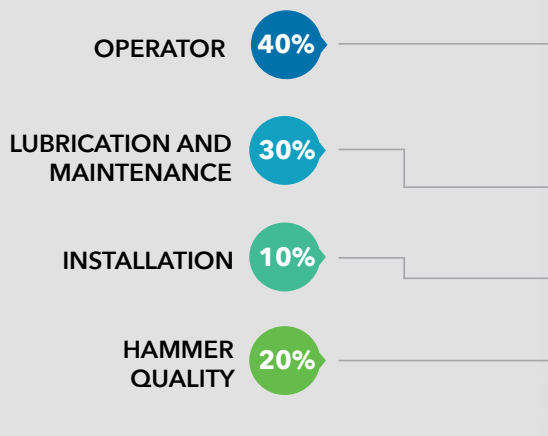

RELIABILITY

Total protection in the most
hostile conditions

The life and operating costs of a hammer

depend on several factors. Correct lubrication and maintenance is one of the most critical:

OEM's APPROVALS

Thanks to a long lasting constructive partnership, our lubricants are **technically approved / recommended** by the most important international machinery manufacturers. A few examples:

... and many others.

INTEGRATED LUBRICATION

A FULL SERVICE package that in addition to the lubricant includes:

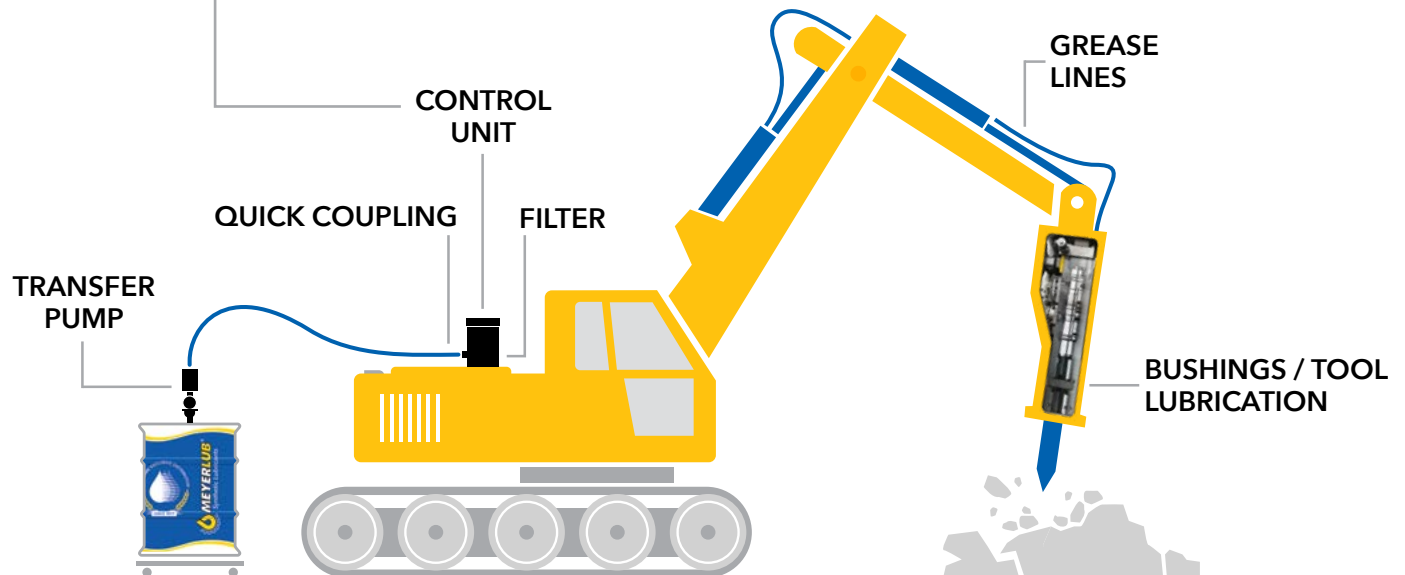

- An innovative lubrication unit.
- A filling pump for lubrication units.
- Assembly and assistance.

- ✓ **WEAR REDUCTION** and protection against breakages
- ✓ **GUARANTEED LUBRICATION** in adequate quantity
- ✓ **TIME REDUCTION ON GREASE APPLICATION** and increase in productivity
- ✓ **OPTIMIZED LUBRICANT CONSUMPTION**
Up to 70% savings compared to manual lubrication

MEYERLUB® INTEGRATED SYSTEM:

In order to achieve an effective hammer lubrication, we offer you a clean and efficient system to preserve your investment.

CONCLUSIONS:

Optimal lubrication all time

Less frequent re-lubrication

Longer hammer life

Great Savings on Total Costs

Increase in Productivity

Cleaner Systems

Recommended by the most important Manufacturers
